

UP FAMNIT

CampusConnect

Smart Lost & Found Recovery System

Students: Elena Nenadović and Nemanja Cvetić

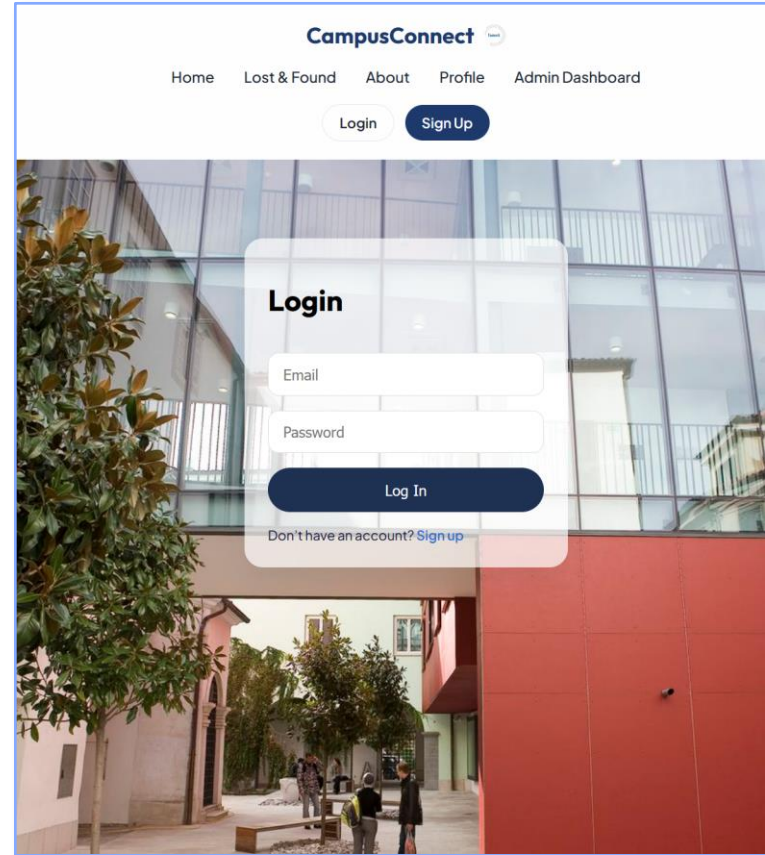

Mentor: Klen Čopič

Introduction

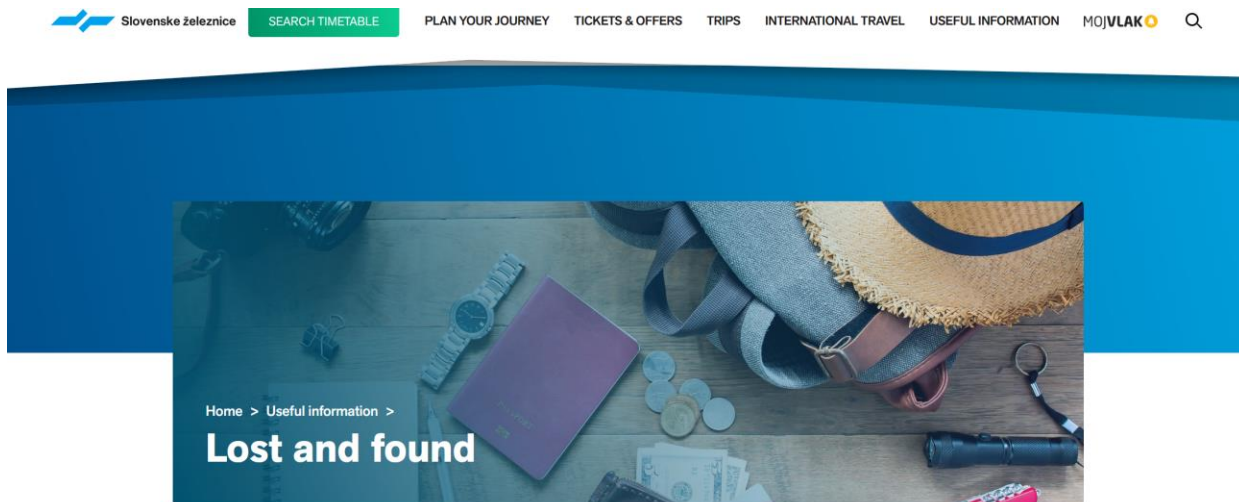

What is CampusConnect?

- Modern web-based platform for university communities (FAMNIT)
- Improving **communication** and **connectivity**
- Digitalizes the traditional lost-and-found process

Existing platforms across Slovenia

- Traditional lost and found process - [Slovenske železnice](#)

Reclaim your lost items at collection centres in Ljubljana and Maribor.

Lost property found at Slovenske železnice train stations or on trains, are collected and stored in collection centres in [Ljubljana and Maribor](#) (list of found items can be viewed at [Found items](#)).

You can reclaim your lost items by prior arrangement every working day, **Monday to Friday**, from 7:00 to 15:00 at:

- Traditional lost and found process - **Airport Ljubljana**

**Lost baggage and
items found on arrival
flights or in the
international part of
the terminal**

Lost and found service

lost.found@fraport-slovenija.si

Open daily between 9.00 and 20.00
hours.

**Lost items in the
public part of the
passenger terminal or
elsewhere at the
airport**

Airport police station

plp_brnik.pukr@policija.si

• Traditional lost and found process - Policija

OSTALI PREDMETI	DENARNICA RJAVE BARVE.	PU KRANJ - PLP BRNIK	11.05.2026

The main purpose of CampusConnect:

Create a **centralized**, **modern**, **searchable**, and **secure** platform for reporting and recovering lost items across university campuses.

Functionalities

- Secure **user authentication** with multiple user roles
- Advanced **browsing** and **filtering** of lost & found items
- Easy **reporting** of lost or found belongings
- Item **claim** and **request** management system
- Interactive **map-based** item tracking
- Centralized **admin** dashboard and moderation tools
- Organized and searchable item **database**

Technologies

- **React** - Frontend development
 - **Node.js** - Backend and API handling
 - **MariaDB** - Database management system
 - **GitHub** - Version control and collaboration
 - **Leaflet & OpenStreetMap** -Interactive map integration
 - **CSS** - Responsive and modern UI styling
 - **Jira** - Project management and task tracking
- 

Development process

March 24 - April 5

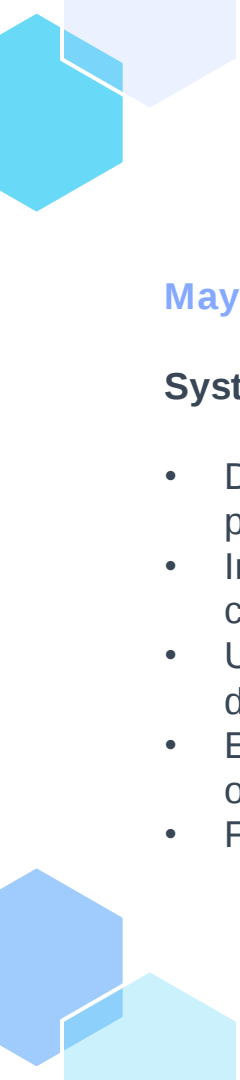

Project Planning & System Design

- Development of the project idea
- Selection of technologies and reasoning behind React and Node.js
- Planning the database structure and schema design
- Mentor consultations regarding the information system architecture
- Decision to use React with Vite for frontend development

April 5 - May 5

Frontend & Backend Development

- Development of the frontend interface and application structure
- Creation of pages and components
- Implementation of frontend logic and responsive UI design
- CSS styling and interface polishing
- Interactive map components using Leaflet
- Database connection
- Development of backend logic, routing, and server-side functions
- Implementation of authentication and core system functionality

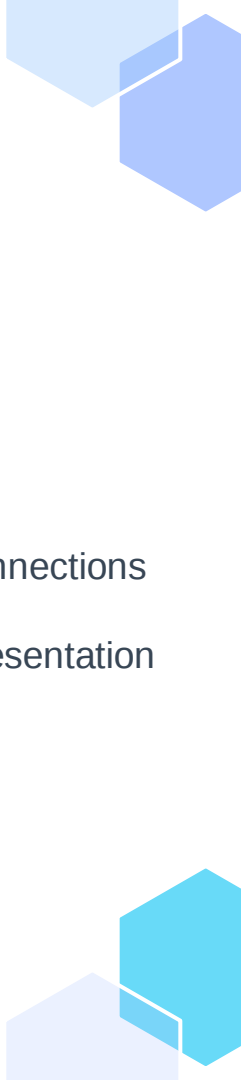

May 5 - May 21

System Features & Final Improvements

- Development of the item claim/request process
- Implementation of messaging and conversation features
- Updating and improving admin dashboard functionalities
- Error fixing, debugging, and system optimization
- Final frontend and backend integration

May 22 – May 24

Final Testing & Documentation

- Comprehensive system testing
 - Checking and fixing remaining errors
 - Testing database functionality and connections
 - Finishing project documentation
 - Final polishing and preparation for presentation
- 

Future work

- Expansion and generalization of the system across multiple universities and faculties
- Integration of higher-quality icons and visual elements for improved readability and user experience
- Development of more advanced and detailed map functionalities
- Addition of real-time notifications and smarter item matching
- Mobile application support for easier campus accessibility

Lost & Found
